Ang Tamaraw GL Dropside ay ang swak na sagot sa iyong transport needs, lalo na kung ikaw ay nasa negosyong tulad ng merchandising, construction, at iba pa. Siguradong makakarating ang iyong mga materyales at produkto—tulad ng mga paleta, lumber, at scaffolding. Dahil sa dropside features nito, madali ang pag-load at unload ng kargada.

Pang personal use? Perfect ang Tamaraw GL Dropside. May automatic transmission at komportableng interior na bagay sa pang-araw-araw na biyahe o weekend road trip.

UTILITY VAN (LWB)

Malaking tulong ang maihahatid ng Tamaraw sa mga nangangailangan ng matibay at malakas na solusyon sa pag-transport at pag-deliver ng goods.

Iba't ibang negosyo ang maaaring maka-benefit dito. Pwedeng pwede ito sa retail at e-commerce na naghahanap ng mabilis at madaling delivery solutions, o 'di kaya'y para sa service-oriented businesses na kailangan ng safe at komportableng sasakyan para sa pag-transport ng mga tao, kasama na ang kanilang tools at equipment. Anuman ang business mo, kaya 'yan ng Tamaraw!

TAMARAW: A SYMBOL OF THE PHILIPPINES

WHAT IS THE TAMARAW?

The tamaraw is the largest wild land mammal in the Philippines. Its scientific name is *Bubalus mindorensis*. It is also known as the 'Mindoro Dwarf Buffalo'. The tamaraw can only be found in the Philippines and it is endemic to Mindoro Island. Its natural habitat is tropical savanna grasslands and forests. Its diet includes wild sugarcane. The tamaraw was first discovered and documented in 1888. From an estimated population of 10,000 in the 1900s, to less than 100 in the 1960s, the tamaraw was declared an endangered species by the IUCN in 1986, and critically endangered in 2000. The introduction of cattle farming in Mindoro, a devastating Rinderpest outbreak (otherwise known as cattle plague) in the 1930s, the loss of its natural habitat, and illegal poaching, are the main reasons for this troubling situation. As of May 2024, the current estimated population of the tamaraw is between 574 and 610.

WHAT ARE THE DIFFERENCES BETWEEN A TAMARAW AND A CARABAO?

The tamaraw is often confused with the domesticated carabao because both belong to the Bovidae family, but here are their differences:

- The tamaraw has distinct markings on its face, has light eyebrows, is darker than a carabao, and has a shorter tail.
- The tamaraw is also smaller, with an average height of 4 ft and weighing 180 kg to 300 kg. The carabao is much bigger.
- The tamaraw's horns form a distinct 'V' shape. A carabao's horns form a 'C' or half-moon shape.
- Tamaraw horns average 14 in to 20 in, while carabao horns average 24 in to 60 in.

WHAT IS THE INTERNATIONAL UNION FOR CONSERVATION OF NATURE (IUCN)?

Established in 1964, the IUCN's 'Red List of Threatened Species' has evolved to become the world's most comprehensive information source on the global extinction risk status of animal species.

THE TAMARAW CONSERVATION PROGRAM (TCP)

The Tamaraw Conservation Program (TCP) was established in 1979 as a special project under the Office of the President to protect and conserve the remaining tamaraws that inhabit Mindoro. It was later transferred to the Philippine Department of Environment and Natural Resources (DENR) in 1987. The TCP's goal is to grow the population to more than 2,000 and remove the tamaraw from the IUCN's critically endangered species list.

WHO ARE THE BANTAY TAMARAW?

These individuals are hired under contract of service by the TCP. They diligently patrol protected areas in Mindoro to ensure that the tamaraw's natural habitat is protected, the population numbers are monitored, and to deter any illegal poaching. There are also indigenous peoples volunteers known as 'Katutubong Bantay Tamaraw' and barangay volunteers aptly called 'Barangay Bantay Tamaraw'.

TOYOTA MOTOR PHILIPPINES AND THE TAMARAW

The Toyota Tamaraw made its debut in 1976 and paved the way for the enormous success of the segment that it also created—the Asian Utility Vehicle (AUV). Through the decades the Tamaraw has been a massive seller known for its toughness, reliability, and iconic status.

In 2024, the made-in-the-Philippines Tamaraw badge returns. To celebrate this milestone, Toyota Motor Philippines has committed its support to the noble efforts of the Tamaraw Conservation Program.
